Pune, Maharashtra | yogeshkumarmallik@gmail.com | +91 77838 55830 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in Java, Spring Boot, React, and cloud technologies. Skilled in building scalable full-stack and IoT-based systems with strong foundations in backend development, REST APIs, and database management.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

August 2023 – May 2027

Pimpri Chinchwad University, Pune

GPA: 8.5/10.00

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL, HTML5, CSS3

Backend: Spring Boot, Spring Security, Spring MVC, Hibernate, JPA, Flask, RESTful APIs

Frontend: React.js, Bootstrap, Tailwind CSS

Database: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Jenkins, CI/CD

Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Maven

PROJECTS

IoT-Integrated Wildlife Monitoring System

Oct 2025 – Nov 2025

Python, YOLOv5, ESP32, OpenCV, PIR Sensor, Flask/Sockets, C++ (Arduino) | [GitHub](#)

- Architected a distributed IoT system with ESP32-CAM nodes and PIR sensors; reduced idle power consumption by 65% via Deep-Sleep optimization.
- Engineered a low-latency vision pipeline streaming real-time JPEG frames to a central YOLOv5 engine, achieving sub-150ms inference over local Wi-Fi.
- Boosted detection accuracy to 94% using custom OpenCV preprocessing for low-light/high-noise conditions, filtering out 40%+ false-positive motion triggers.
- Built a Flask-based monitoring dashboard for real-time species classification alerts, reducing manual surveillance effort by 80%.

Styora | Full-Stack E-Commerce Platform

Nov 2025 – Jan 2026

Java, Spring Boot, React.js, Spring Data JPA, Spring Security, PostgreSQL, Supabase, Vercel | [GitHub](#) | [Live Demo](#)

- Architected a scalable full-stack e-commerce application using Spring Boot and React, implementing JWT-based authentication and Role-Based Access Control (RBAC) via Spring Security.
- Migrated application data from a local database to cloud-hosted PostgreSQL (Supabase), improving data reliability and accessibility.
- Optimized deployment workflows by configuring Vercel CI/CD pipelines, resolving complex root-directory mapping issues and reducing deployment time for the frontend.
- Streamlined backend performance through efficient data modelling with Spring Data JPA, ensuring seamless synchronization between the React frontend and the cloud database.

CERTIFICATIONS

- AWS Academy Data Engineering Virtual Internship, AICTE EduSkills — 2024
- Software Engineering Specialization, HKUST (Coursera) — 2025
- Oracle Cloud Infrastructure AI Foundations Associate — Oracle, 2024
- IBM Machine Learning Professional Certificate — 2026
